

Cholangiocarcinoma Foundation®

Providing Hope in Research

Investing in Transformative Research

- **2025-2026 Research Fellowships:** Research Fellowships: 11 grants totaling \$825,000 to support early-career innovative research.
- **Innovation Grant:** With support of the Bachrach Family Foundation and the Mather Family Foundation, CCF is awarding \$1.5M through 2027 to tackle high-priority, often complex, research questions that require the collaboration of diverse senior-career experts across multiple institutions.

Unlocking the Future

- CCF is working with the Global Collaboration for Adaptive Research on the ARBOR BTC (Master Protocol Trial) a game-changing approach to clinical trials that will make it easier for patients to access promising therapies faster.
- In coordination with the global research community, CCF is promoting **genome-wide studies** to better understand the disease.

Collaborative Endeavors and Strategic Initiatives

- In partnership with Citizen Health, CCF is empowering individuals to contribute their health data to the **Patient Registry** to accelerate research.
- **International Cholangiocarcinoma Research Network (ICRN)** experts worldwide are engaged in a research and collaboration and young investigator mentorship for maximum impact.

Paving the Way for Future Discoveries

- Advocacy-focused programming will be available on an app so patients, caregivers, and healthcare providers can access CCF resources and support 24/7.
- CCF continues to build global relationships that are uniting patients and strengthening resources.
- CCF is working with donors to expand Research Fellowships and add new transformational research opportunities including a Career Development Award for mid-career investigators to advance CCA research.

Your support fuels these advancements, driving hope and innovation in cholangiocarcinoma research. Thank you for making a difference.
